# LS60 BATCH LIQUID SAMPLING

HE LS-60 Liquid Sampler is an integrated syringe sampler and optical particle counting system with an easy-to-use Windows<sup>tm</sup> based software interface.

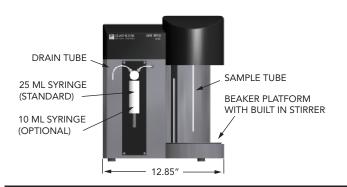

With a sample flow rate of 60 ml/min, the LS-60 provides unprecedented measurement speed and accuracy. Using a high accuracy syringe pump flow control system and high volume sensor; it is the perfect tool for multiple batch sampling applications.

The LS-60 is easy to configure and operate. Data is automatically recorded and easily available in real-time graph and tabular form. Reports can be preconfigured and printed at the touch of a key.
